DETAILED ACTION

The amendment filed October 12, 2004 and the remarks filed June 2, 2004 (originally filed March 26, 2004 have been entered.

Claims 1-3 are currently amended.

Claims 4-46 are cancelled.

Claims 47-54 are newly submitted.

Claims 1-3 and 47-54 are pending and are examined on the merits.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Specification

1. The disclosure is objected to because of the following informalities: the first paragraph of the specification must recite that the present application "is a continuation of U. S. Application Serial No. 08/874,109 filed June 12, 1997, now abandoned" to complete the continuity information.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

1. Claims 52 and 53 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Application/Control Number: 09/771,904

Art Unit: 1638

2. Claims 52 and 53 are indefinite and confusing in that these claims recite SEQ ID NO: 11 and 12, but they depend on claim 51, which incorporates the limitation that Lys is substituted for Glu. However, SEQ ID NO: 11 and 12 do not incorporate this limitation.

3. The rejection of the claims under 35 USC 112, second paragraph set forth in the last office action are withdrawn in view of the amendments to the claims.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-3 and 47-54 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of copending Application No. 08/572,027. Although the conflicting claims are not identical, they are not patentably distinct from each other because the isolated nucleic acid that encodes a delta-12 fatty acid desaturase having at least one mutation in a region encoding a His-Xa-Xaa-Xaa-His amino acid motif are obvious in view of the same that is at least about 20 nucleotides from a Brassicaceae or Helianthus of Application No. 08/572,027.

Application/Control Number: 09/771,904

Art Unit: 1638

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting

claims have not in fact been patented.

No claims are allowed.
